AISIN

NOW IN INDIA

BRAKE & CLUTCH FLUID

ブレーキ&クラッチフルード

- Superior Hydraulic Pressure Transfer
- High Boiling Point for Safety
- Advanced Synthetic Formula
- Wide Compatibility
- Corrosion & Moisture Resistance
- Optimized for Indian Driving Conditions

Reliable Response, Long-Term Protection.

AISIN Brake & Clutch Fluid with advanced formulation safeguards system components and supports long-term reliability across varied driving conditions.

Applications

- Passenger Vehicles
- Light Commercial Vehicles
- Brake And Clutch Hydraulic Systems
- Compatible With ABS-equipped Systems

Meets and exceeds the following specifications:

DOT 3

- FMVSS116 DOT4
- FMVSS116 DOT3
- ISO 4925 Class 4
- ISO 4925 Class 3
- SAE J1704
- SAE J1703
- IS 8654

DOT 4

- FMVSS116 DOT 3
- SAE J1703
- ISO 4925 Class 3
- IS 8654

Specification	DOT 3	DOT 4
Dry Boiling Point(min)	205°C	230 °C
Wet Boiling Point (min)	140 °C	155 °C

Key Features & Benefits

- Reliable Brake & Clutch Response- Stable hydraulic performance ensures consistent pedal feel and control.
- High Temperature Resistance - High boiling point reduces vapor lock during heavy braking and clutch operation.
- Moisture Control & Corrosion Protection - Helps prevent rust, oxidation and internal system damage.
- Advanced Synthetic Formulation - Optimized polyglycol-based fluid for durability and system protection.
- All Weather Performance - Maintains smooth flow and response even at low temperature.
- Seal & Rubber Compatibility - Protects seals and hoses supporting long service life.
- Compatible with Modern Systems - Suitable for ABS-equipped brake and hydraulic clutch systems.
- Designed for Severe Driving Conditions - Reliable performance under high temperature, traffic congestion and varied road conditions.

Recommended Guidance

- **DOT 3**

  Suitable for standard passenger vehicles and normal driving conditions where braking temperature remain moderate.

- **DOT 4**

  Recommended for vehicles operating in heavy traffic, high ambient temperature or demanding driving conditions requiring higher thermal stability.
